

ARCHITEXTURE

HARDWOOD

An addition to Mohawk's hardwood line, Architexture showcases the wood's natural beauty with ample character traits, including cracks, knots and splits in 7 1/2" wide and up to 72" long planks. This natural character is enhanced by soft wire brushing, and our Arctic White color option features saw marks for even more distressing.

The tasteful choice of oak exudes an unmistakable air of sophistication to any home, and Architexture features eight fashion-forward colors with a beautiful assortment of rich brown, weathered gray, unique natural and white tones that lend aesthetic flair to the collection.

The Architexture line will be the first Mohawk product to feature the new Uniclic™ Multi-Fit Locking System, providing additional installation benefits to our standard Uniclic Locking System.
